Education

Stony Brook University *Expected Graduation: May 2027*

Major: Computer Science + Applied Math & Statistics (Data Science) *GPA: 3.40*

Honors and Scholarship Awards: Global Excellence Scholarship

Relevant Coursework: Full Stack Development, Software Security, Programming Abstractions, Systems Fundamentals, Algorithms, Statistics & Probability

Research

Ethos Lab @ Department of Computer Science *Stony Brook University*

Undergraduate Research Assistant *Sep 2025 –Present*

- *Developing fraud detection algorithms to identify EZ-Pass scam patterns, analyzing payment processing vulnerabilities and transaction anomalies*
- *Automated scammer behavior monitoring using Selenium and Python, generating test payment data to estimate potential financial damage and identify attack vectors.*

Professional Experience

Department of Computer Science *Stony Brook University*

Teaching Assistant – Data Structures & Algorithms *Aug 2025 - Present*

- Guided 30+ students in mastering asymptotic analysis, recursion, and key data structures (linked lists, trees, heaps, hash tables, graphs) through office hours and recitations.
- Conducted comprehensive midterm review sessions, creating practice problems and visual explanations to clarify challenging concepts.

Personal Projects

Discord Voice Channel Activity Monitor – (Node.js, Discord.js, Cloud)

- Built a Node.js/Discord.js bot with JSON-based settings and PM2 deployment on a cloud server to track user activity in voice channels.
- Implemented customizable DM notifications, VIP lists, and channel thresholds for each user and server with real-time monitoring.

Skills

Languages: Python, JavaScript, **TypeScript**, Java, C

Frontend: React, React Native, Next.js

Backend: Node.js, Express.js

Databases & Cloud: MongoDB, PostgreSQL, Firebase, AWS

Tools: Git, Docker, Linux, PM2, Selenium
