EDUCATION

Stony Brook University

Expected Graduation: May 2027

B.S., Computer Science + Applied Math & Statistics (Data Science) | GPA: 3.40

Honors & Scholarships: Global Excellence Scholarship

Relevant Coursework: Software Security, Systems Fundamentals I & II, Algorithms

RESEARCH

Undergraduate Research Assistant — Ethos Lab, Dept. of Computer Science, Stony Brook University

Sep 2025 – Dec 2025

PI: Abisheka Pitumpe | Team: 2

- Built a real-time pipeline to monitor newly issued SSL/TLS certificates and flag fraudulent domains impersonating EZ-Pass tolling services, as part of a cybersecurity-focused research effort under a faculty PI.
- Used Selenium to automate certificate and domain scraping and Python to filter, triage, and validate flagged sites, designing keyword- and heuristic-based detection logic for scam website identification.

INTERNSHIPS

Software Engineering Intern — Clustr

Jan 2026 – Sept 2026 (expected)

Cross-platform React Native social/scheduling app | ~8-person dev team

- Built server-side community infrastructure using Firebase Cloud Functions, including CRUD operations for communities, posts, and comments with enforced ban/edit permissions to prevent client-side database tampering, plus join/leave workflows, like/dislike interactions, and activity feed endpoints.
- Implemented secure authentication features, including a password reset flow (client screen plus backend cloud function) and custom claims to drive new-user onboarding logic.

Software Engineering Intern — Prenora Dynamics LLC

Jun 2026 – Sept 2026 (expected)

~8-person team

- Own end-to-end design decisions for an in-house, in-platform video chat feature, tasked with researching and evaluating available SDKs/approaches to replace reliance on third-party platforms (e.g., Zoom, Google Meet).
- Set up the PostgreSQL/Supabase database and backend data models for Jamory, an in-house app connecting students with music tutors to schedule and host lessons in one platform, and built a seed-data workflow to streamline debugging and local development.

PROJECTS

TuneAcademy (React, NumPy, Essentia, Firestore)

- Built the AI/audio-analysis pipeline for an app matching music students with instructors, extracting pitch, rhythm, and tone features with Essentia/NumPy, then pivoting from a planned ML model to rule-based scoring under hackathon time and compute constraints.
- Set up a CI/CD pipeline using GitHub Actions to lint and test the codebase, then auto-build and deploy the app to Cloudflare Workers.

CAMPUS INVOLVEMENT

Teaching Assistant — Data Structures & Algorithms, Dept. of Computer Science, Stony Brook University

Aug 2025 – Dec 2025

- Supported a 240-student Data Structures & Algorithms course through weekly office hours and recitations; created original review materials and technical documentation adopted for subsequent semesters, and led midterm review sessions reaching 100+ students combined in-person and via Zoom.

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C

Tools: Selenium, Git, Docker, Linux, PM2

Backend: Node.js, Express.js, FastAPI

Frontend: React, React Native, Next.js

Databases & Cloud: MongoDB, PostgreSQL, Firebase/Firestore, AWS, GCP
