Cover Letter

Dear Hiring Manager,

I am excited to apply for the ICT Infrastructure & Operations Internship at Kyowa Kirin North America. As a double major in Computer Science and Applied Mathematics & Statistics at Stony Brook University, I have built strong technical and problem-solving skills and am eager to apply them to support infrastructure, service delivery, and customer self-service initiatives at KKNA.

As a Teaching Assistant for Data Structures & Algorithms, I strengthened my ability to explain complex concepts and troubleshoot issues – skills directly relevant to supporting end users and documenting systems for clarity. My leadership roles as Treasurer of the Game Development & Design Club and as an International Peer Mentor have also sharpened my teamwork and communication skills across diverse groups.

In addition, I bring hands-on project experience through building a Discord Voice Channel Activity Monitor bot and a personal productivity app, where I worked across the full development lifecycle. These projects fostered my interest in automation, workflow improvement, and user-focused design – priorities central to Kyowa Kirin's ICT strategy.

I am inspired by Kyowa Kirin's mission to translate science into smiles and look forward to learning about cloud platforms, IT governance, and GxP/manufacturing IT while contributing to impactful infrastructure projects. I would welcome the opportunity to bring my technical skills and collaborative mindset to your ICT Infrastructure & Operations team this summer.

Thank you for your time and consideration.

Sincerely,

Hein Zarni Aung
