Cover Letter

Dear Hiring Team,

I am writing to express my strong interest in the Full Stack Engineer Intern position at TENEX. As a Computer Science and Data Science student at Stony Brook University, I bring hands-on experience in full-stack development and security research that aligns closely with your mission. Currently, as an Undergraduate Research Assistant at Stony Brook's Ethos Lab, I develop fraud detection algorithms to identify EZ-Pass scam patterns and automate scammer behavior monitoring using Selenium and Python. This work has given me a security-minded perspective on software development—teaching me to think proactively about vulnerabilities and attack vectors while building scalable systems.

My technical background matches your requirements well. I have extensive experience with backend development using Node.js, Express.js, and Python, and frontend development with React and JavaScript. My Discord Voice Channel Activity Monitor project demonstrates my ability to build production-ready systems: I architected and deployed a real-time monitoring bot with customizable notifications, JSON-based configuration management, and PM2 deployment on cloud infrastructure. My proficiency across six programming languages—from Java and C to OCaml and GDScript—demonstrates my ability to learn rapidly and adapt to new technologies. I'm particularly excited to deepen my expertise in Go and TypeScript/Next.js as part of your team. As a Teaching Assistant for Data Structures & Algorithms, I've also honed my ability to communicate complex technical concepts clearly, guiding 30+ students through challenging algorithmic problems.

I am fully prepared to relocate to San Jose for the duration of the internship and am excited about contributing to TENEX's culture as an early team member. Your emphasis on in-person collaboration resonates with my experience in leadership roles across multiple campus organizations. I would welcome the opportunity to discuss how I can contribute to your team's success.

Sincerely,

Hein Zarni Aung
