EDUCATION

Stony Brook University

Expected Graduation: May 2027

B.S., Computer Science + Applied Math & Statistics (Data Science) | GPA: 3.40

Relevant Coursework: Full Stack Development, Software Security, Systems Fundamentals I & II, Algorithms

INTERNSHIPS

Software Engineering Intern — Clustr

Jan 2026 - Sept 2026 (expected)

Cross-platform React Native social/scheduling app | ~8-person dev team

- Built server-side community infrastructure using Firebase Cloud Functions, including CRUD operations for communities, posts, and comments with enforced ban/edit permissions to prevent client-side database tampering, plus join/leave workflows and activity feed endpoints.
- Implemented secure authentication features, including a password reset flow (client screen plus backend cloud function) and custom claims to drive new-user onboarding logic.

Software Engineering Intern — Prenora Dynamics LLC

Jun 2026 - Sept 2026 (expected)

~8-person team

- Own end-to-end design decisions for an in-house, in-platform video chat feature, tasked with researching and evaluating available SDKs/approaches to replace reliance on third-party platforms.
- Set up a PostgreSQL/Supabase database and backend data models for Jamory, an in-house app connecting students with music tutors, and built a seed-data workflow to streamline debugging and local development.

PROJECTS

TuneAcademy

React, NumPy, Essentia, Firestore

- Built the AI/audio-analysis pipeline for an app matching music students with instructors based on specific technical weaknesses, using Essentia and NumPy to extract pitch, rhythm, and tone features from recorded performances.
- Pivoted from a planned machine learning model to rule-based scoring algorithms under hackathon time and compute constraints, delivering reliable weakness detection within the 36-hour build window.
- Set up a CI/CD pipeline using GitHub Actions to lint and test the codebase, then auto-build and deploy to Cloudflare Workers; broader app includes a React/Tailwind frontend and a Python/FastAPI backend in Docker on GCP.

CAMPUS INVOLVEMENT

Teaching Assistant - Data Structures & Algorithms, Stony Brook University

Aug 2025 - Dec 2025

- Supported a 240-student Data Structures & Algorithms course through weekly office hours and recitations, guiding students through asymptotic analysis, recursion, and core data structures.
- Created original review materials from scratch for midterm exam preparation, hosting 2-hour sessions reaching 100+ students; materials were adopted as the basis for subsequent semesters' review sessions.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, C

Frontend: React, React Native, Next.js

Backend: Node.js, Express.js, FastAPI

Databases & Cloud: PostgreSQL, MongoDB, Firebase/Firestore, AWS, GCP

Tools: Git, Docker, Linux, CI/CD (GitHub Actions), Selenium
